

The subjective scale of the phenomenological control scale and the SWASH can be administered online using a questionnaire platform, for example Qualtrics (<https://www.qualtrics.com/uk/>)

There are four audio files:

1. From the script start to the presentation of the negative visual suggestion (item 8).
2. From the end of the negative visual suggestion (item 8) to the first amnesia response (item 9)
3. Between the first and second amnesia responses ("now you can remember everything").
4. Instructions for reporting experience of suggestions.

Recording 1 can be presented as a video with a blank screen up until the presentation of the slide for item 8 (a picture of three balls) (e.g., https://www.youtube.com/watch?v=RSEgMkHn_mk)

Following recordings 1, 2 and 3 text boxes is presented for participant report.

Following recording 4, the response booklet is presented as a questionnaire.
